CORE COMPETENCIES

JavaScript • MySQL • Node • RESTful API
Team Leadership/Collaboration • React
Project Management • AJAX • Express
SQL • Effective Communication • Problem Resolution

PROJECT EXPERIENCE

PORTFOLIO APP

A web app created to showcase the projects I have built and what I am working on. This is an everchanging project with new features being implemented over time.

- Built with Node and React
- Features in progress – mobile responsive design, carousel to cycle through projects, user authentication using Express with the goal of creating a sign in URL to get to a dashboard where I can dynamically add projects as I complete them to be viewed on my portfolio
- <https://github.com/Bigjames728/portfolio-app> -- www.codingwithjames.com

FULL STACK WEB APP

Allow teachers to sign up for access to the app, including authentication, view a list of courses and specific course detail, create, update and delete courses stored in a database

- Designed front end using React
- Created back end and the RESTful API using Node, Express, JavaScript, Sequelize and SQLite
- Implemented CRUD operations and user authentication
- <https://github.com/Bigjames728/Full-Stack-App>

GIF SEARCH WEB APP

Allow users to search a database of gifs through a third-party API

- Built the front end and consumed the gify.com API using React
- Built a search feature to search the database for certain gifs
- <https://github.com/Bigjames728/gif-search>
